Introduction to Pate De Verre and Glass Casting

Sally Eyring. July 17 – 20

Four days for \$595

Pate De Verre is a specialized casting technique in which colors are precisely added using a paste of colored frits and powders.

Since Pate De Verre is a casting technique, students wishing to learn only the basics of casting are also invited to attend.

Students will learn about different mold making materials and how to work with them, how to form and vent molds, how to mix the glass paste to formulate the desired colors, color interactions, glass volume calculations for casting and much more.

Sandwiches, soft drinks and snacks will be provided.

We are really looking forward to this class!!

Sally is an accomplished glass artist in Boston who studied pate de verre under world-famous masters Kimiake and Shinichi Higuchi. She is well known throughout New England for her exquisite work and tireless involvement in the IGGA. Check out her website, www.glassdreams.us

Call us or go to www.cdvkiln.com/menuworkshops.htm to sign up.
